Question by Question Justification

Content of Questions	Question Numbers	Rationale
Module 1. Placement Re-Verification Module (JV & S)		
Verification of Employment	JV1_A1 – JV18	This module includes a series of questions designed to re-verify the student’s initial job or school placement. Questions are included to assess whether the student met the Job Corps definition of “being placed” for different placement categories, including: part- or full-time employment, school/training, job and college combination, or OJT/subsidized placement. The purpose of the re-verification is to monitor the services provided by placement contractors to ensure that contract requirements are being met and students are receiving quality services. If responses to the re-verification questions indicate that the placement may not have been valid, a “questionable placement” is identified. Such notations will be used to generate notices to be sent to the appropriate Job Corps office for final determination.
